Project Overview

VideoCall Pro is a video conferencing platform designed for educational institutions. It provides online meetings, attendance tracking, scheduling, and collaboration features in a single platform.

Completed Features

- ✓ User Login & Registration
- ✓ Faculty and Student Dashboards
- ✓ Meeting Creation & Joining
- ✓ Audio, Video, and Screen Sharing Controls
- ✓ Meeting Scheduling
- ✓ Attendance Management
- ✓ Academic Structure Management (Branch, Year, Section)
- ✓ Meeting History & Participant Management
- ✓ Database and Backend Integration
- ✓ Responsive UI Design

Pending Features

- ↻ AI Meeting Summaries
- ↻ Live Subtitles & Language Translation
- ↻ Whiteboard Collaboration

 Breakout Rooms

 Advanced Analytics & Reports

 Recording System Improvements

 Security and Performance Enhancements

Current Status

The core functionality of VideoCall Pro has been completed successfully. Users can create and join meetings, manage attendance, schedule sessions, and access role-based dashboards. The remaining work mainly focuses on AI features, collaboration tools, analytics, and production-level improvements.

Overall Project Progress: Approximately 75% Completed
